1st Sprint Post-Mortem | 01.04.20 – 07.04.20 | Alexander

1. What went well as a team?
   - We got increasingly better at developing our ideas and being less biased towards our own ideas
   - We managed to have a quite egalitarian ideation phase
   - Everyone is committed

2. What went well personally?
   - I managed to not be stressed too much
   - Protocoling can actually be fun
   - I love the visual concept Robert and me came up with

3. How can we keep that?
   - Keep our frequent meeting schedule
   - Sharing the load of project management is good
   - Leave people some time for thinking

   ----

4. What did not go well as a team?
   - Sometimes it wasn't clear if you'd be needed in time or not. That caused useless waiting sometimes
   - Organisation of the First Pitch wasn't optimal with people not on the same page about when and what to record
   - The git structure was not used by everyone
   - Not much free time yet

5. What did not go well personally?
   - I got frustrated in the 4th meeting and failed to handle my moderator role correctly in the end
   - I didn't know how to use the recording software in time
   - I am less involved in the general management process than Lars

6. How can we avoid that?
   - Be extra clear about the schedule and tasks before handing in deliverables.
   - Reinforce the use of the git in the next task
   - Give everyone a day off this week!
   - Rely less on Lars to figure everything out
